

UC IBC

31HH1/Y/.../D/BAM 6808-RIKUTEC / 15. Revision

Specification packaging materials data sheet

Technical Data

Nominal volume	ca. 1000 liter / approx. 264 gal.
Outer Diameter	ca. 1200 x 1000 mm / approx. 47.2 x 39.4in.
Total height	ca. 1165 mm / approx. 45.9 in.
Diameter filling opening	3 x S62 x 5mm
Weight	ca. 95 kg / approx. 209 lb.

Construction and description

IBC	<ul style="list-style-type: none"> • manufactured by a coextrusion blow moulding process • Outer box material: HD PE • Inner bottle I coextruded 2-layer wall-design: Outside layer : HD PE Inside layer : HD PE (virgin-no additives HD PE)
Design	<ul style="list-style-type: none"> • special designed double safety containment
Bungs	<ul style="list-style-type: none"> • 1 x S62 x 5 air vent cap of HD PE with PTFE laminate • 2 x S62 x 5 cap of HD PE
Closing torques	corresponding to requirements to dip tube and seal selection
